

## **Ground Water Post-Assessment Answer Key**

### **Multiple Choice:**

1. C
2. D
3. A
4. D
5. C
6. A
7. A
8. Any answer that is logical
9. D

### **Short Constructed Responses:**

1. Not all fresh water is available for human use because it may be frozen or trapped in unyielding soils or bedrock fractures. Some water is too polluted to use.
2. Eventually, the contamination in the ground water will make its way to a nearby pond, lake, or river to contaminate surface water.
3. Water is important for humans, plants/crops, and animals. If humans waste or pollute water, the available water resources will be diminished.
